github.com/eneriberri

linkedin.com/in/irenenguyen

SKILLS

Ruby, Rails, Javascript, Backbone.js, Node.js, Java, jQuery, HTML5, CSS3

RECENT PROJECTS

[POLL CAT](#) (Built with: Rails, Backbone), 2013

- Live polling web app: graphically renders realtime data received through SMS. Integrates Twilio API, Pusher API.

[Lightweight Rails](#) (Built with: Ruby), 2013

- Rebuilt the core components of the controller and view layers of Ruby on Rails: capability to communicate with a web-server, controller functionality, template rendering, sessions

[ActiveRecord Core](#) (Built with: Ruby), 2013

- Rebuilt the core components of the model layer of Ruby on Rails; includes query abstraction, associations, database connecting, smart saving

[MyChat](#) (Built with: Node.js), 2013

- Chatroom app: uses Socket.IO client-side library to exchange data with the server. Supports multiple rooms, user capability to set nicknames and change/join rooms.

[Huffman Encoder](#) (Built with: Java), 2013

- Compression and decompression program that works with all file types including images
